WHERE WE ARE

Micor Tooling serves the global market with world leading products, from the wood to paper and cardboard industry. Our market offer is broad and consists of circular saw blades, band saw blades, planers, moulders, PCD tools and knives.

Our 175-year accumulated experience together with extensive research, development, and new machine park allow for a high degree of repetition. This has led to Micor Tooling, thru its different brands, to be able to manufacture engineered cutting tools with high reputation to multiple industries.

WHAT WE DO

Micor Tooling provides a comprehensive selection of saw blades, band saw blades, planing tools, moulders, PCD tools and knives. With four manufacturing sites in Sweden, Finland and Germany, we produce our renowned brands - Micor, Langshyttan, BBM, LTT and HDS - which are distributed to over 40 countries globally. Leveraging over 175 years of combined expertise, we understand what it takes to meet our customers' needs. Our multiple production sites enable us to offer short lead times and flexibility when service is crucial.

At Micor Tooling, our mission is to develop highly efficient tools, foster innovative ideas, and set sustainable trends. Our innovations not only enhance the speed, flexibility, and cost-effectiveness of your production processes but also allow us to balance environmental care with economic efficiency while delivering top-notch machining quality. Our commitment to craftsmanship and personal dedication, along with continuous improvement and development, ensures we consistently achieve high-quality standards. Micor Tooling operates on renewable energy and holds ISO 9001 and 14001 certifications.

WE CARE

All of our production plants use 100% renewable energy* because sustainability matters to us. Sustainability is central and reflected in our company's core values which are fundamentally about caring for people and the environment.

*) Newly acquired companies should be using
100% renewable energy within 24 months.

WHEN PERFORMANCE COUNTS

COLLECTION OF
SUSTAINABILITY DATA
BEGINS FROM 2019

2020

Collection of sustainability data begins from 2019 – focusing on Scope 1 & 2.

Switchover from natural gas to biogas in Laholm.

ISO 14001
AT MICOR

2022

Introduction of energy mapping in Laholm and Långshyttan.

ISO 14001 at Micor.

Health & Safety policy established and implemented.

Start of Safety Audits

100% RENEWABLE
ENERGY IN SWEDEN
AND IN FINLAND

2023

Our own transport vehicles are operated without fossil fuels.

100% renewable energy in Sweden and in Finland.

Measuring of CO2 begins, Scope 3.
